KE8OHV Ultimate Ham Radio Command Center

Version 2 Professional User Manual

Copyright KE8OHV 2026

1. Introduction

This software is a complete all-in-one ham radio command center.

It combines rig control, SDR, propagation, logging, and tools into one system.

It is designed to simplify your ham radio operation.

2. Quick Start Guide

Open the program.

Use navigation to go to Rig Control.

Select your radio make and model.

Set COM port and baud rate.

Begin operating.

3. Rig Control (CAT Control + Telemetry Ready)

Control your radio directly from the interface.

Change frequency, mode, and band.

Monitor SWR, power output, and signal strength.

Ensure proper connection via USB or RS232.

4. SDR & Waterfall

Displays real-time band activity.

Helps locate signals quickly.

Visual representation of RF signals.

5. Live Meters

S-Meter shows signal strength.

Power meter shows transmit output.

SWR meter helps with antenna tuning.

6. HF Net System

Shows active nets.

Click to jump to frequencies.

Works with CAT control.

7. Propagation Tools

Displays solar flux, K-index, and A-index.

Helps determine band conditions.

Useful for DX planning.

8. Tools & Utilities

Antenna calculators.

Frequency tools.

Station helpers.

9. Logging System

Log contacts.

Track operating activity.

Store call signs and notes.

10. Navigation System

Use quick jump buttons.

Move between sections instantly.

Highlighted sections show navigation success.

11. Donation System

The software is free.

Donations support development.

Use Cash App or Venmo.

12. Troubleshooting

Check COM port settings.

Verify cables.

Restart program if needed.
